Top 10 Most Popular Genres

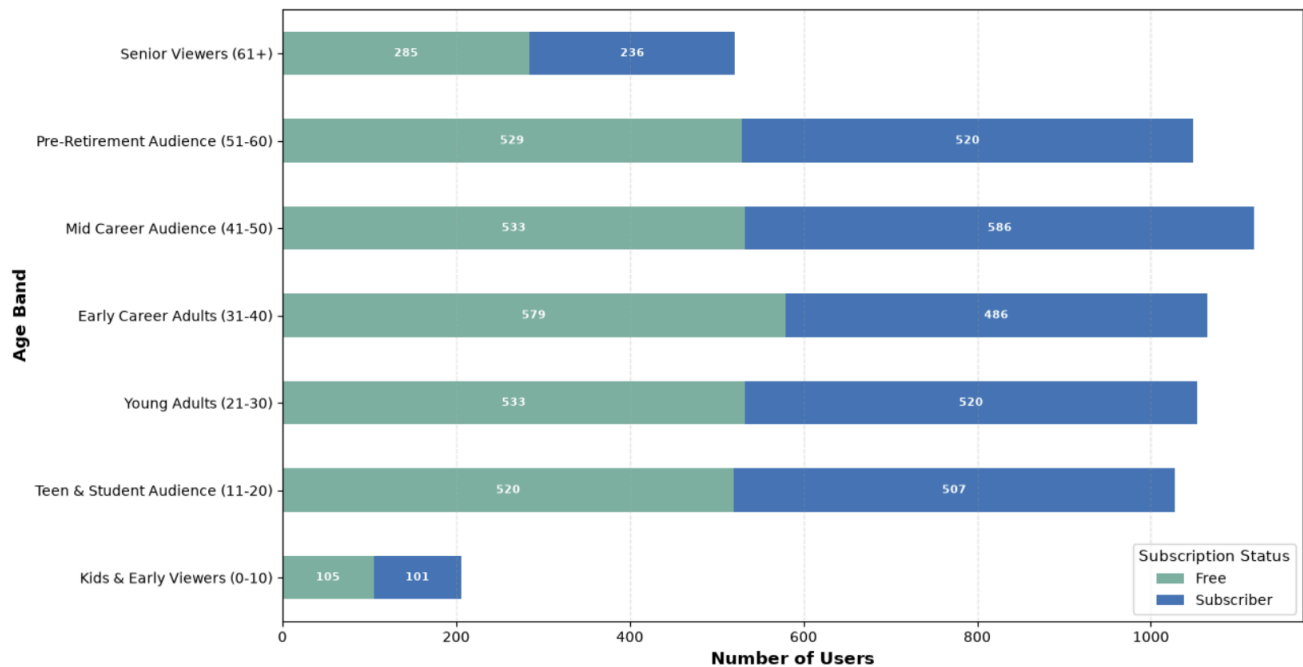

Top 10 Movies by Average Rating

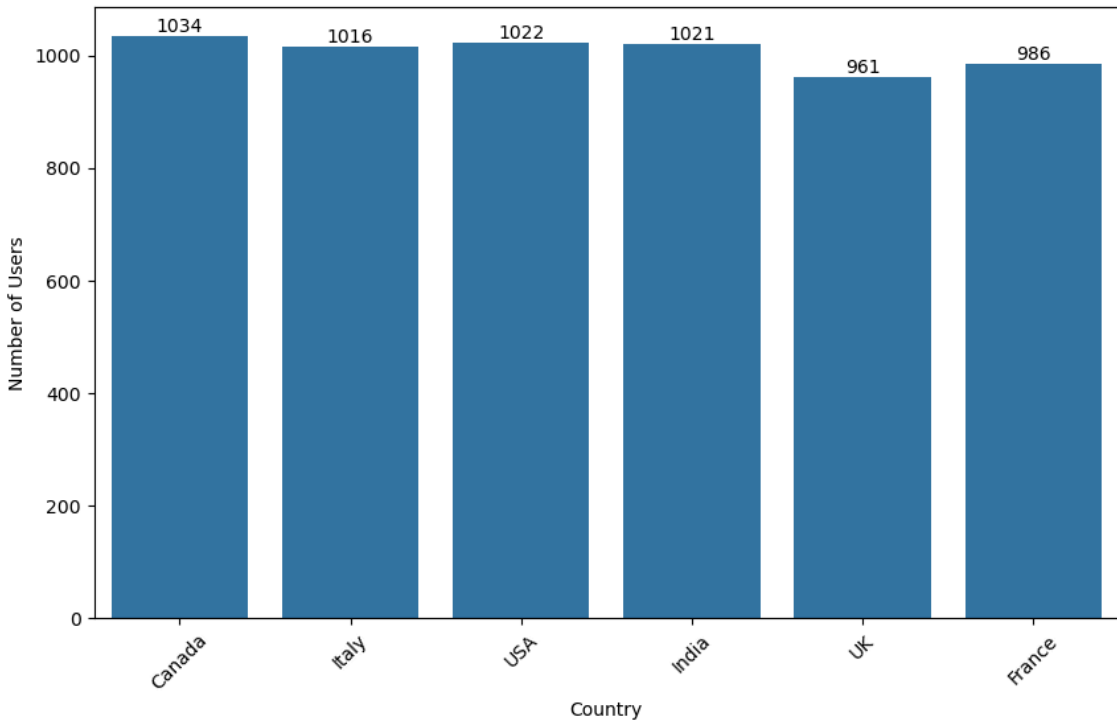

Key Insights:

- **Mainstream dominance** — Comedy and Drama lead total viewership by a significant margin over other genres
- **Concentrated engagement** — A few key genres drive the majority of views; most others contribute minimally
- **High audience satisfaction** — Top-rated movies consistently score close to 4/5

User Distribution by Age Group

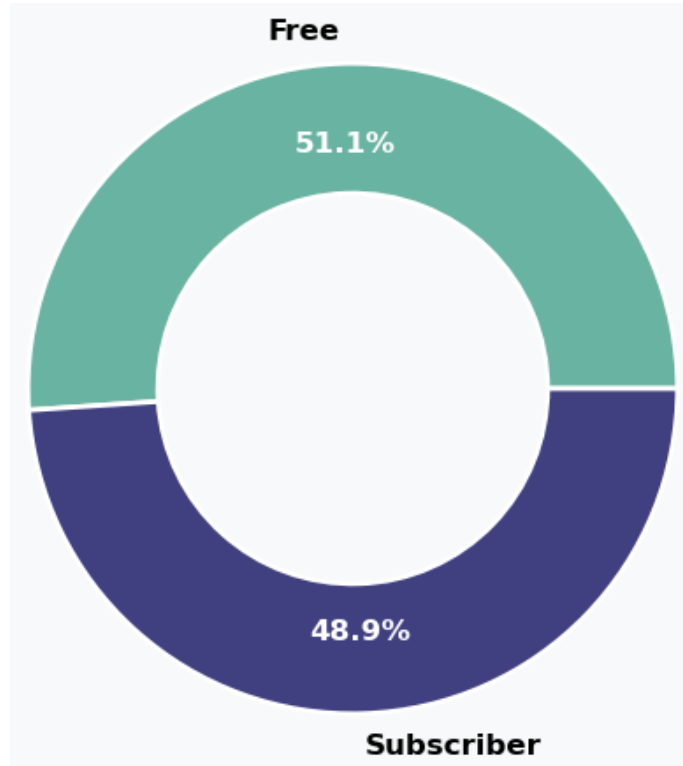

User Distribution by Country

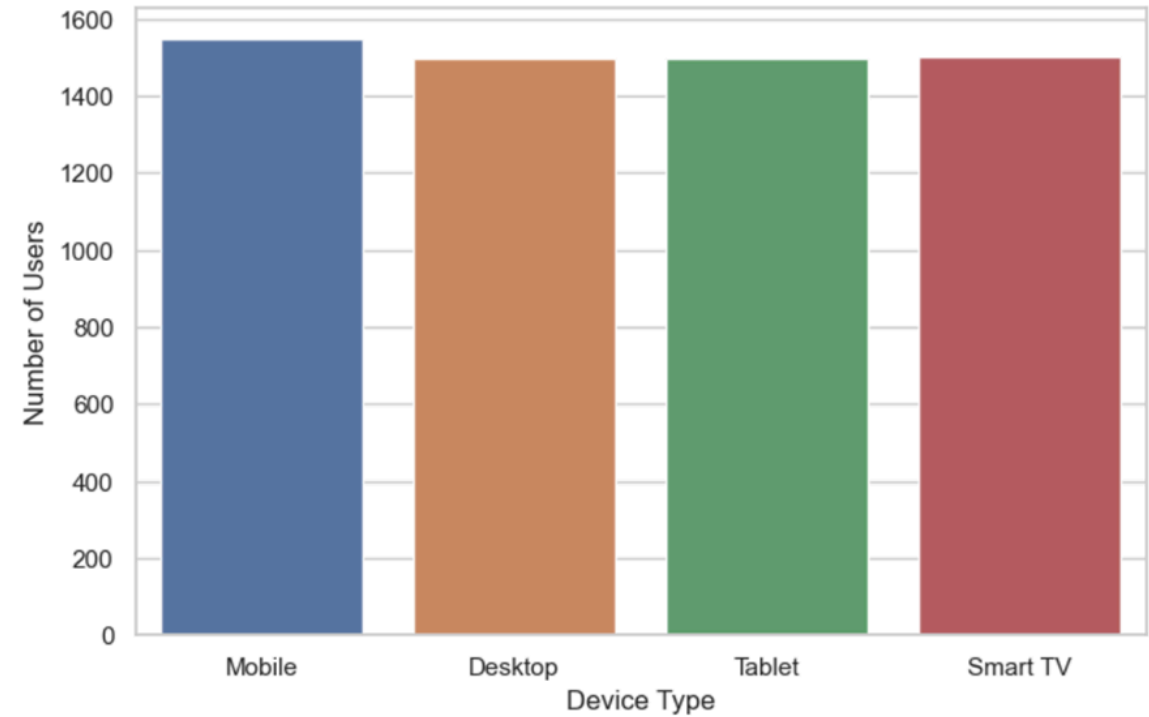

Key Insights:

- **Broadly even age distribution** — Most age bands sit at ~1,000–1,100 users — Kids (0-10, 206) and Senior Viewers (61+, 521) are notably smaller
- **Global balance** — Countries show tightly clustered counts, indicating broad international reach

Overall User Subscription Status

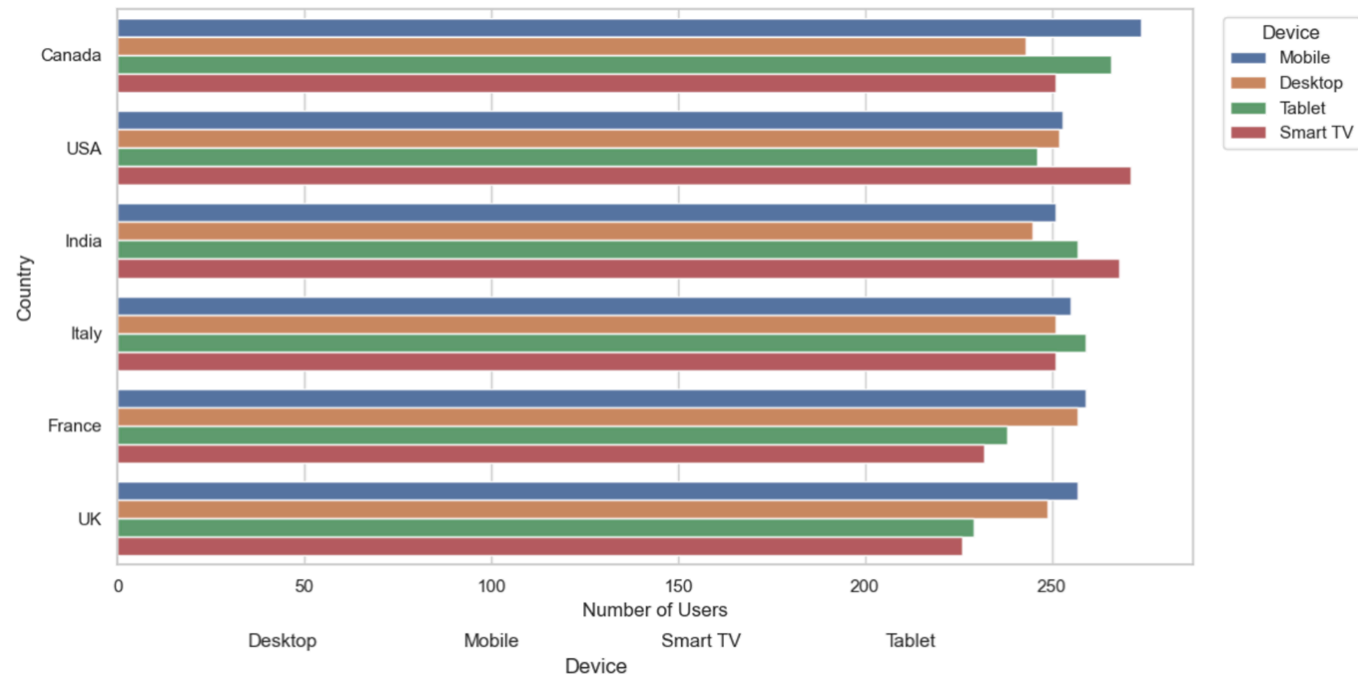

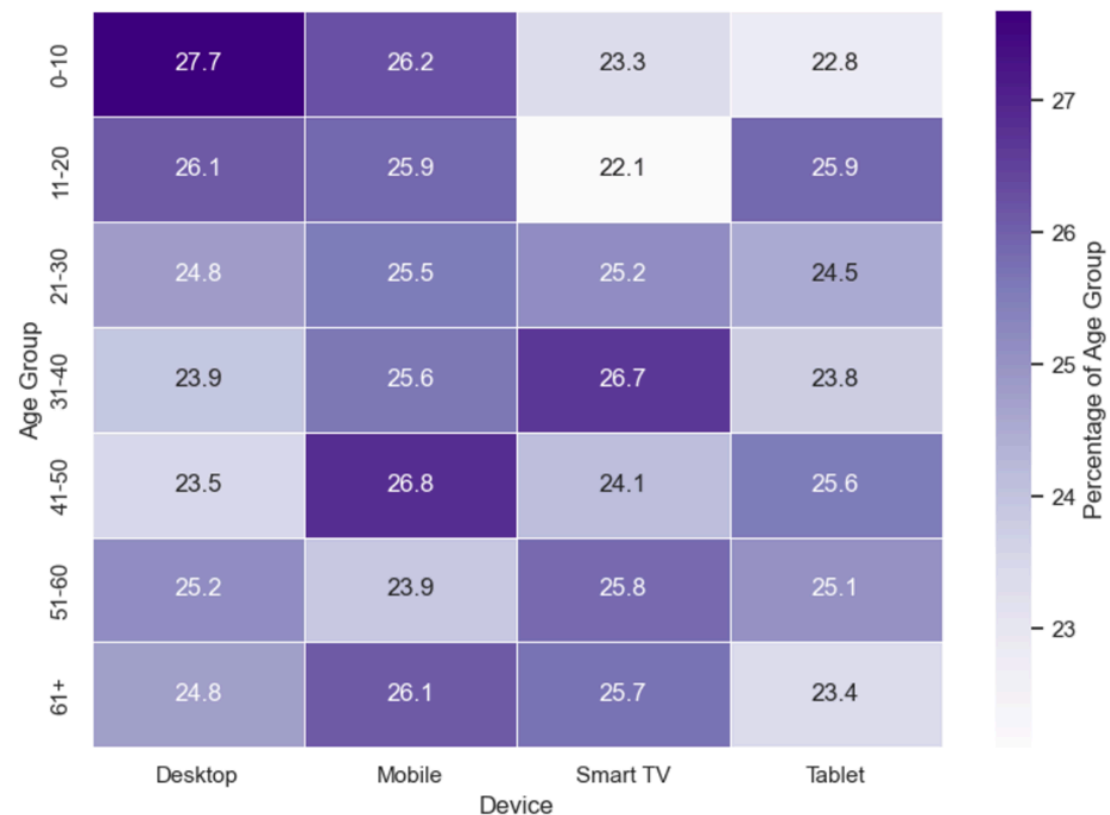

Overall Device Usage

Key Insights:

- **Even subscription split** — Free vs subscriber users are almost equal.
- **Consistent device usage** — All device types show similar user counts.

Device Preferences by Age Group and Country

Key Insights:

- **Consistent cross-device usage** — All values fall within 22–28% across all age groups
- **Weak age trend** — Younger users (0-10, 11-20) use Smart TV less; all other patterns are weak
- **Country device leaders** — Mobile leads in Canada, UK & France; Smart TV strongest in USA & India; Tablet tops Italy
- **Near-equal country distribution** — Max gap of 31 users per country across all devices

Total Ratings by Genre Name

Total Ratings by Rating Month

Key Insights

- **High Engagement:** Over 92% of the platform's 3,883 movies have been rated, showing strong user interest.
- **Active Audience:** 6,040 users submitted nearly 10,000 ratings, averaging 1.6 ratings per user.
- **Genre Preferences:** Drama leads with over 4K ratings, followed by Comedy; Sci-Fi and Horror see the lowest engagement.
- **Subscription Split:** Content is viewed almost equally by Free Users (51.1%) and Subscribers (48.9%), highlighting a clear opportunity for paid conversions.
- **Seasonality:** Monthly activity is generally stable but peaks noticeably in January, August, and December.

User Demographics & Viewing Behaviour

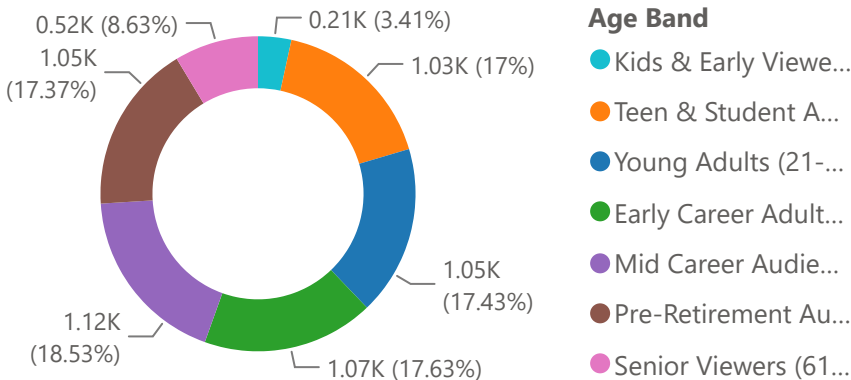

Key Insights

- The most engaged users are aged **41–50**, indicating this is the core active audience segment.
- **Comedy and Drama are consistently preferred across all age groups**, showing universal content appeal.
- The platform has a **male-dominant user base**, indicating a gender imbalance in audience distribution.
- Subscription status shows **minimal difference in viewing behaviour**, suggesting similar engagement patterns across user types.

The User Footprint

User Distribution by Age Group

Country Distribution

User Device Preferences

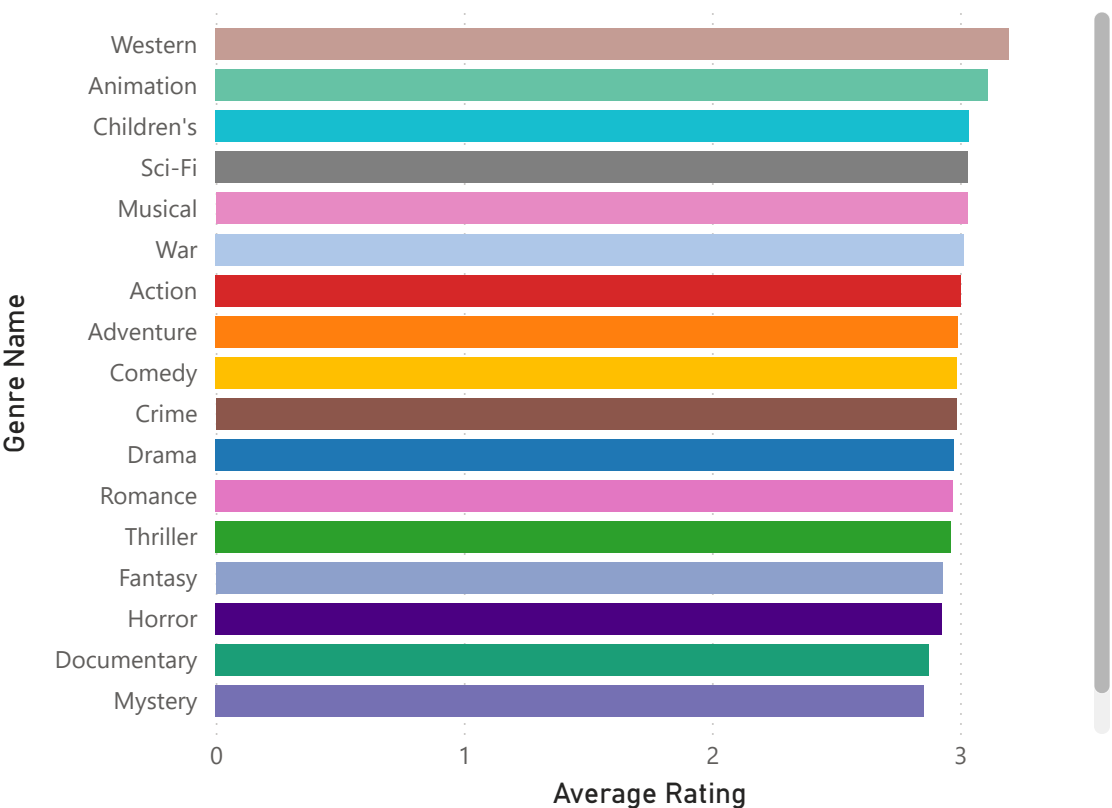

Key Insights

- **Balanced device usage** - Mobile, Desktop, Tablet and Smart TV each account for 23–27% of users, indicating a consistent multi-device viewing experience.
- **Mobile & Smart TV lead slightly** - Mobile is the preferred device in Canada, France, UK and USA, while Smart TV performs strongest in India and USA.
- **Broad audience reach** - Users are well distributed across all age groups and countries, showing the platform appeals to a diverse global audience.
- **Consistent user behaviour** - Filtering by country or age group changes user counts, but device preferences remain largely consistent, suggesting similar viewing habits across markets.
- **Business opportunity** - Maintain a seamless experience across all devices while tailoring marketing and content recommendations by country, age group and subscription status.

Total		2.95	2603

Key Insights

- Genre ratings are closely grouped around ~3.0, so acquisition decisions should not rely on average rating alone.
- Top preferred genres change by country and age band, showing the need for localised content acquisition.
- Subscriber and Free users show different movie-level results, so subscriber-focused content should be prioritised for the paid model.
- Use rating count with average rating to avoid selecting movies with high ratings but very low engagement.

Conversion Catalyst

Avg Rating Cross Plot: Free vs Subscription [Coloured Genre Markers, Sized by Total Views]

Key Insights

- **Top-Left (Paywall Goldmine):** Acquire cost-effective titles driving premium sign-ups.
- **Bottom-Right (Free Hooks):** Retain high-engagement titles for ad revenue.
- **Visuals:** Size = Total Views; Color = Genre.
- **Targeting:** Use slicers to isolate demographic preferences.
- **Directive:** Buy high-variance converters instead of expensive universal hits.

Premium Pivot: Strategic Takeaways

Content Acquisition

- **Prioritize Conversion:** Acquire high-variance titles to drive premium sign-ups, rather than buying on volume alone.
- **Protect Ad Revenue:** Keep universally popular genres (Drama, Comedy) on the free tier to maintain a wide top-of-funnel.

Audience Targeting

- **Target the Core:** Focus premium marketing heavily on the 35–54 age band—our most engaged demographic.
- **Localize Content:** Tailor regional catalogs based on specific demographic preferences, not global averages.

Platform Delivery

- **Maintain Device Parity:** Deliver a seamless UI across all platforms to support our evenly split global device usage.
- **Optimize by Region:** Focus mobile marketing in North America/France, and enhance Smart TV interfaces for the USA/India.
